

# Herzum Quick Linker Documentation

This documentation is for the downloadable version of **Herzum Quick Linker 4**.

Not using this? See the [earlier versions of the documentation](#).

## What's new in v. 4.0

### Improving existing Administration screens

- The **Partnership Administration** screen allows to update Source/Target base URL.
- The **Mapping Administration** screen includes the possibility to copy an existing mapping to create a new one.
- The **Mapping Configuration** screen has been enriched to allow:
  - Bulk upgrading of link type and link versus on the existing quick links
  - Other optional settings.

### New Administration screens

- The **Escalate Post Function Administration** screen adds the capability to easily manage (add, edit, delete) the escalate issue post function on the workflows.
- The **Mapping Scheme Administration, Mapping Scheme Configuration and Mapping Pattern Administration** screens add the capability to configure mappings reusable on multiple Projects.

### Usage facilities

- Enabling the **create another** box to create and link more than an issue in one click
- Issues **ranking** on the Herzum Quick Link panel
- Improving remote issue creation by including more fields on the screen.
- The issues created and/or linked via **Jira link** by Quick linker can be **Populated and Synced**.
- **JQL Functions** to search issues linked via Quick links.
