Amplifier for Mattermost and Bitbucket - General Info and Advanced Features

Choose the cog icon at top right of the screen to go to Bitbucket Administration.

Go to Herzum Mattermost Amplifier General Info

To set the connection between your Bitbucket Environment and your Mattermost environment enter:

**Mattermost URL** - the Mattermost base URL.

**Token** - the Mattermost Personal Access Token.
The Most Personal Access Token must first be created in your Matermost environment.
Once the global settings have been entered Bitbucket will attempt to connect with Mattermost.

See here for instructions on how to get your Mattermost personal access token.
Successful connection status will show "Connected" on this page and the username of the administrator having `sysadmin` role in Mattermost.
Advanced Features

Click to open the Advanced Features panel.

Connection Status

- Connected

  Last connection to Mattermost instance at http://18.224.165.232:8065 was saved successfully

  Username: admin

  Roles: system_admin system_user
### Advanced Features

**Toggle Channel**

With this feature enabled, all teams and channels brought into Bitbucket from Mattermost will automatically be enabled.

**Mattermost Synchronizer**

Here you can set the number of Mattermost synch log files you wish to save. The logs can be found under Synch Logs.

Also you can set the Synch Interval (in milliseconds).

Click **Save** to preserve these settings.

**Start Synch**

Click to start the synchronization between Mattermost and Jira. The results of the synchronization are shown.

#### Mattermost Synchronizer
