Working with limit on allowed file attachment extensions

> Herzum Attachments Manager app for Jira allows to define the **allowed file extensions** for the files that may be attached to the Jira issues.

This pages illustrates what you can expect when a limit on the **allowed file extensions** for the files that may be attached to the Jira issues has been configured for a project.
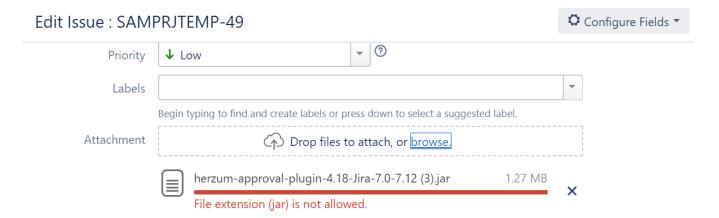

Assuming the following setting:

Allowed Extension	Delete ⑦
pdf	🗑
doc	🗑
xls	🗑

if it is left empty, all extensions are allowed

When an user try to attach a file having an extension that is not included in the list of the allowed extensions, an alert appears and the file is not attached to the issue.

On the issue Create and Edit screens the alert displays as follows:

Edit Issue : SAMPRJTEMP-49   ⚙ Configure Fields ▾

Priority   ↓ Low   ▾   ⑦

Labels   [   ] ▾

Begin typing to find and create labels or press down to select a suggested label.

Attachment   ☁ Drop files to attach, or browse.

📄 herzum-approval-plugin-4.18-Jira-7.0-7.12 (3).jar   1.27 MB   ✕

File extension (jar) is not allowed.

On the issue View screen the alert displays as follows:

▾ Description
Click to add description

▾ Attachments   ...

☁ Drop files to attach, or browse.

📄

export (1).zip
Cancel

❗ **File "export (1).zip" was not uploaded**   ✕
File extension (zip) is not allowed.
